Summary	Frontend Developer with hands-on experience building responsive web applications using React.js, JavaScript, HTML, and CSS. Experienced in developing reusable components, implementing authentication flows, protected routes, state management, API integration, and modern frontend development practices. Strong problem-solving skills with ongoing experience building real-world projects and continuously improving JavaScript, React.js, and Data Structures & Algorithms knowledge.
---------	---

Education	Punjab College of Technical Education Bachelor of Computer Applications (BCA) • 7.8 Computer Applications Ludhaina • 2015-2018
-----------	--

Experience	Ytasker Ludhaina Virtual Assistant & Technology Support 2018-2025 Technology Support 2024-2025 • Participated in frontend development workflows including responsive layouts, UI implementation, debugging, and feature support. • Strengthened practical knowledge of modern web development through hands-on project work and continuous learning. Virtual Assistant 2018-2024 • Worked as a Virtual Assistant supporting business operations, client requirements, and day-to-day project activities. • Worked with HTML, CSS, JavaScript, and React.js while assisting with web application development and UI-related tasks.
------------	--

Projects	Restaurant QR Ordering System Technologies: React.js, JavaScript, Context API, React Router, REST APIs, Tailwind CSS • Built a responsive QR-based restaurant ordering system with menu browsing, cart, checkout, and order tracking. • Implemented global state management using Context API and dynamic table identification through QR parameters. • Integrated REST APIs for menu data, categories, search, and meal details. • Developed reusable React components with responsive Tailwind CSS layouts. • Implemented debounced search to reduce unnecessary API requests and improve performance.
----------	--

Technical Skills

</> Frontend

HTML5, CSS3, JavaScript (ES6+), React.js

📁 State Management

Context API, Redux

🔑 Authentication

JWT Authentication, Protected Routes

🔧 Tools & Technologies

Git, GitHub, REST APIs, Responsive Design

🔗 Programming Concepts

DOM Manipulation, Closures, Debouncing, Event Loop, Asynchronous JavaScript

🔍 Problem Solving

Data Structures & Algorithms, LeetCode

CORE FRONTEND SKILLS

- **Component-Based Development:** Build reusable React components and fetch/render components dynamically based on application requirements.
- **API Integration:** Fetch data from REST APIs using asynchronous JavaScript and integrate API responses into React components.
- **State Management:** Manage application and component state using React Hooks, Context API, and Redux.
- **Routing:** Implement client-side routing, nested routes, protected routes, and authentication-based navigation using React Router.
- **Authentication & Authorization:** Implement login flows, JWT-based authentication, protected pages, token handling, and user access control.
- **Reusable Architecture:** Break complex interfaces into smaller, reusable components to improve maintainability and scalability.
- **Dynamic UI Development:** Render UI components conditionally and dynamically based on API responses, user actions, application state, and requirements.
- **Responsive Design:** Develop responsive interfaces that work effectively across desktop, tablet, and mobile devices.
- **JavaScript Problem Solving:** Apply ES6+ concepts including closures, promises, async/await, event loop, debouncing, DOM manipulation, and asynchronous programming.
- **Performance Optimization:** Use techniques such as debouncing, component reusability, efficient state management, and controlled API requests to improve application performance.
- **Debugging & Troubleshooting:** Identify and resolve UI, routing, state-management, API integration, and runtime issues during development.
- **Git & GitHub Workflow:** Use Git and GitHub for version control, feature development, code management, and project collaboration.
- **Problem Solving & DSA:** Regularly practice Data Structures and Algorithms and JavaScript-based problem solving through coding challenges.
